Appendix A: Claude 3.5 Sonnet 4.6 Analysis

[1] Status: Correct **Technical Classification:** Stylistic Inversion (Grammatically Sound) **Syntactic Logic:** The sentence opens with the negative adverb "Rarely," triggering subject-auxiliary inversion ("will you find"). This is a well-formed fronted negative adverbial construction. The embedded relative clause "who has never told a deliberate lie" correctly modifies the indefinite pronoun "someone." **Rectification:** N/A

---

[2] Status: Incorrect **Technical Classification:** Tense–Time Adverbial Incongruence (Simple Present vs. Past Time Frame) **Syntactic Logic:** The main verb "swims" is inflected for simple present tense, yet the temporal adverbial "last summer" anchors the event unambiguously in the past. English requires the simple past tense when a definite past time expression is present. The verb phrase must be "swam." **Rectification:** He swam in the pool every day last summer.

---

[3] Status: Correct **Technical Classification:** Nominal Post-Modification (Noun Phrase with Participial Adjective) **Syntactic Logic:** "The correcting typewriter" uses a present participle "correcting" as a pre-head modifier, functioning as an attributive adjective within the direct object NP. The verb "considered" takes a double-object construction: [NP the correcting typewriter] [NP a luxury], which is a standard S-V-O-OC (object complement) pattern. Grammatically intact. **Rectification:** N/A

---

[4] Status: Correct **Technical Classification:** Emphatic Reflexive Pronoun Usage (Appositive Intensifier) **Syntactic Logic:** "Himself" is used as an appositive intensifier, not a reflexive pronoun. It modifies the subject "The Grinch" to add emphasis, a well-established pattern in English grammar (the intensive pronoun). Subject-verb agreement and tense are consistent. **Rectification:** N/A

---

[5] Status: Correct **Technical Classification:** Quantifier–Noun Construction with Partitive Reading **Syntactic Logic:** "Little of the reading" uses the quantifier "little" with a partitive genitive "of the reading," functioning as the direct object of "understands." "Little" as a determiner/pronoun correctly conveys a small, indefinite quantity. The construction is grammatically well-formed. **Rectification:** N/A

---

[6] Status: Incorrect **Technical Classification:** Adverbial Scope Ambiguity / Misattached Temporal Modifier **Syntactic Logic:** The time adverbial "every day from 9:00 a.m. until 5:00 p.m." is syntactically adjoined to the relative clause verb "are buried," creating the absurd

implication that burials occur continuously every day within those hours. The adverbial is intended to modify visiting hours (the cemetery's operating hours), not the burial events. The sentence requires structural revision to disambiguate the modifier's scope. **Rectification:** Many tourists visit Arlington National Cemetery — open every day from 9:00 a.m. until 5:00 p.m. — where veterans and military personnel are buried.

---

[7] Status: Correct **Technical Classification:** Agreement by Syntactic Head (Proximity vs. Notional Agreement) **Syntactic Logic:** The subject of the sentence is the head noun "woman" (singular), not "dogs." The prepositional phrase "with all the dogs" is a post-nominal modifier and does not alter subject number. The verb "walks" correctly agrees with the singular head "woman." This is a well-formed case of grammatical (not notional) agreement. **Rectification:** N/A

---

[8] Status: Incorrect **Technical Classification:** Adjective–Adverb Substitution Error (Flat Adverb vs. Manner Adverb) **Syntactic Logic:** The verb "ate" is an action verb requiring a manner adverb to modify it. "Quick" is an adjective; the correct adverbial form is "quickly." While "quick" can function as a flat adverb in informal registers for a handful of fixed expressions (e.g., "come quick"), "ate her lunch quick" is non-standard and violates formal grammatical norms. **Rectification:** She ate her lunch quickly.

---

[9] Status: Incorrect **Technical Classification:** Comparative Degree Misconstruction (Double Comparison / Missing Nominal Head) **Syntactic Logic:** "A bit more entertaining play" is syntactically defective. The comparative adjective "more entertaining" requires the degree marker "more" to modify the adjective alone, but "play" is an unmodified bare noun. The sentence needs the article "a" before "play" to be repositioned, and the construction should read "a bit more entertaining than the last play." Additionally, the phrasing is awkward; the intended meaning calls for "a somewhat more entertaining play." **Rectification:** It was a somewhat more entertaining play than the last one we saw.

---

[10] Status: Correct **Technical Classification:** Infinitival Purpose Clause with Embedded Interrogative **Syntactic Logic:** "To find out what our customers want" is a non-finite infinitival clause expressing purpose, correctly embedded as an adjunct. "What our customers want" is an embedded indirect question functioning as the object of "find out." The tense, mood, and syntactic dependencies are all properly formed. **Rectification:** N/A

---

[11] Status: Correct **Technical Classification:** Compound Predicate with Coordinated Adverbial Subordination **Syntactic Logic:** Two main predicates ("drove" and "turned") are coordinated by "but," with the subordinate clause "before we reached it" correctly adjoined to the second predicate. The pronoun "it" correctly refers back to "the river." Tense consistency (past simple throughout) is maintained. **Rectification:** N/A

---

[12] Status: Incorrect **Technical Classification:** Spurious Indefinite Article Before Non-Count (Mass) Noun **Syntactic Logic:** "Chemistry" in the academic subject sense is a mass (non-count) noun and does not take the indefinite article "a." The article "a" is licensed only before singular count nouns or nouns with countable readings. The correct form omits the article entirely: "learning chemistry in class." **Rectification:** The students are learning chemistry in class.

---

[13] Status: Incorrect **Technical Classification:** Faulty Parallelism — Mixed Gerundive and Nominal Coordination **Syntactic Logic:** The three items coordinated after "include" must be grammatically parallel. "Winning the election" is a gerund phrase, but "a national health program" is a bare NP, and "the educational system" is another bare NP. All three items should share the same syntactic form. The correction aligns all items as gerund phrases expressing goals. **Rectification:** The candidate's goals include winning the election, establishing a national health program, and reforming the educational system.

---

[14] Status: Correct **Technical Classification:** Gender-Neutral Singular Pronoun Agreement (Formal Paired Pronoun Strategy) **Syntactic Logic:** The antecedent "a person" is a singular indefinite noun phrase. The sentence uses the paired pronouns "he or she" and "his or her," a formally correct strategy for gender-neutral reference to a singular indefinite antecedent. Both pronoun pairs agree in number and case with their grammatical function (subject and possessive, respectively). **Rectification:** N/A

---

[15] Status: Incorrect **Technical Classification:** Adjective–Adverb Substitution Error with Linking Verb (Predicate Adjective vs. Manner Adverb) **Syntactic Logic:** "Smells" here is a copulative/linking verb describing a sensory quality of the subject. Linking verbs take predicate adjectives, not adverbs. "Badly" is an adverb and would mean the dog has a poor sense of smell (i.e., its olfactory ability is defective). The intended meaning — that the dog has an unpleasant odour — requires the predicate adjective "bad." **Rectification:** The dog smells bad.

---

[16] Status: Incorrect **Technical Classification:** Sentence Fragment — Nominal Relative Clause Detached from Matrix Sentence **Syntactic Logic:** "A junior high that was a bad experience" is a nominal/appositive relative clause that is syntactically dependent; it cannot stand as an independent sentence because it lacks a finite main predicate of its own that is not embedded. The relative clause modifies "Morris Junior High" and must remain attached to the preceding sentence either with a comma or by integration. **Rectification:** Then I attended Morris Junior High, a junior high that was a bad experience.

---

[17] Status: Incorrect **Technical Classification:** Faulty Parallelism — Mixed Adverbial and Prepositional Phrase Coordination **Syntactic Logic:** Three manner adverbials modify "write": "quickly" (adverb), "accurately" (adverb), and "in a detailed manner" (prepositional phrase). The third item disrupts the parallel adverbial structure. It must be converted to a simple adverb to maintain coordination symmetry. **Rectification:** The production manager was asked to write his report quickly, accurately, and in detail.

---

[18] Status: Incorrect **Technical Classification:** Dangling Participial Phrase — Subject Mismatch **Syntactic Logic:** The present participial phrase "After reading the original study" has an implicit subject that must match the subject of the main clause. The main clause subject is "I," which is correct — the human "I" can do the reading. This sentence is actually grammatically acceptable. However, there is a subtle tense issue: "I find" in present tense is used in an analytic/academic context that is well-established. Upon reflection, the sentence is **correct**. **Rectification:** N/A

---

[19] Status: Correct **Technical Classification:** Modal Verb Construction with Negative Infinitive **Syntactic Logic:** "May consider not having any child" is a well-formed modal + infinitive structure. The negation "not" correctly precedes the gerund "having," which itself takes the NP "any child" as its object. The use of "any" in a negative-polarity context (within the scope of "not") is grammatically licensed. **Rectification:** N/A

---

[20] Status: Correct **Technical Classification:** Parallel Gerundive Coordination **Syntactic Logic:** The three items coordinated as objects of "likes" — "hiking," "swimming," and "riding a bicycle" — are all gerund phrases, maintaining strict syntactic parallelism. Subject-verb agreement ("Mary likes") is correct. The sentence is fully well-formed. **Rectification:** N/A

---

[21] Status: Correct **Technical Classification:** Catenative Verb Construction with Infinitival Complement **Syntactic Logic:** "Advise" is a catenative verb taking a to-infinitive complement: "advise + [NP you] + [to-infinitive to be cautious]." The structure is S-V-O-Infinitive, which is the canonical pattern for this verb class. Grammatically impeccable. **Rectification:** N/A

---

[22] Status: Incorrect **Technical Classification:** Unnecessary Sentence Boundary — Paratactic Juxtaposition Without Coordinator (Asyndeton Fragmentation) **Syntactic Logic:** The two sentences "He enjoys walking through the country" and "He often goes backpacking on his vacations" are thematically and logically related and would be more cohesive as a compound sentence. While two short sentences are not strictly ungrammatical, compare with Sentence 33, which presents the correct version using "and" as coordinator. Since both appear in the document and 33 is the revised form, 22 represents an inferior, fragmented

construction. **Rectification:** He enjoys walking through the country, and he often goes backpacking on his vacations.

---

[23] Status: Correct **Technical Classification:** Future Perfect Aspect — Prospective Completion Marking **Syntactic Logic:** "Will have worked" is the future perfect construction (will + have + past participle), correctly used to express an action that will be completed by a specific future point ("by the end of this pay period"). The time adverbial "by the end of this pay period" is the canonical trigger for future perfect aspect. **Rectification:** N/A

---

[24] Status: Correct **Technical Classification:** Triadic Passive Coordination with Climactic Ordering **Syntactic Logic:** Three passive verb phrases — "was arrested," "tortured," and "bludgeoned to death" — are correctly coordinated in parallel past-passive form under the single auxiliary "was." The final coordinator "and" signals closure of the series. The sentence is grammatically and rhetorically well-formed. **Rectification:** N/A

---

[25] Status: Incorrect **Technical Classification:** Agentless Passive with Thematic Demotion (Awkward Passive Voice) **Syntactic Logic:** "Trouble is caused when people disobey rules" employs a passive construction that demotes the logical agent of trouble-causing. While not strictly ungrammatical, the passive here is poorly motivated: the agent ("people who disobey") is recoverable and named in the subordinate clause, making the passive needlessly indirect. Active voice improves both clarity and syntactic economy. **Rectification:** People cause trouble when they disobey rules that have been established for the safety of all.

---

[26] Status: Incorrect **Technical Classification:** Subject-Verb Agreement Failure — Head Noun vs. Proximal Noun Attraction **Syntactic Logic:** The subject is the NP "The bakeries," which is a plural noun phrase. The verb "makes" is inflected for third-person singular. The plural head noun "bakeries" requires the plural verb form "make." This is a classic case of proximity attraction, where the writer incorrectly agrees with the nearest noun ("area") rather than the actual syntactic head. **Rectification:** The bakeries in this area make delicious pastries.

---

[27] Status: Incorrect **Technical Classification:** Circumlocution / Pleonastic Prepositional Phrase (Redundant Nominalisation) **Syntactic Logic:** "On account of the fact that it was necessary for him to help support his family" is a heavily nominalised, redundant adverbial phrase. "On account of the fact that" is a verbose substitute for "because," and "it was necessary for him to" can be compressed to a simple infinitive. This violates the economy principle of syntactic well-formedness in formal written English. **Rectification:** He dropped out of school because he needed to help support his family.

---

[28] Status: Correct **Technical Classification:** Absolute Participial Phrase — Causal/Explanatory Adjunct **Syntactic Logic:** "Not having studied the lab manual carefully" is a perfect participial phrase (with negation) functioning as a causal adjunct. Its implicit subject is coreferential with the matrix subject "They," which is grammatically licensed. The phrase correctly explains the reason for the failure. **Rectification:** N/A

---

[29] Status: Incorrect **Technical Classification:** Adjective–Infinitive Complementation Error (Wrong Preposition Selection) **Syntactic Logic:** The adjective "interested" selects a prepositional complement headed by "in," followed by a gerund, not a bare infinitive. The construction "interested to learn" is non-standard; the idiomatic and grammatically prescribed form is "interested in learning." The preposition "in" is lexically required by the adjective "interested." **Rectification:** He is interested in learning guitar.

---

[30] Status: Correct **Technical Classification:** Compound Sentence with Ambiguous Pronoun Reference (Contextually Resolvable) **Syntactic Logic:** The semicolon correctly joins two independent clauses. The pronoun "its" in the second clause could theoretically refer to "asthma" or "death rate," but "the cause of asthma" is semantically the more plausible reading and is resolvable in context. The grammar is technically sound; any ambiguity is pragmatic rather than syntactic. **Rectification:** N/A

---

[31] Status: Correct **Technical Classification:** Concessive Compound Sentence with Adversative Coordinator **Syntactic Logic:** Two independent clauses are joined by the adversative coordinator "but," expressing contrast between the rain and the successful picnic. The adverb "anyway" correctly reinforces the concessive meaning. Past simple tense is consistent throughout. **Rectification:** N/A

---

[32] Status: Incorrect **Technical Classification:** Verb Selection Error — Delexical Verb Confusion (Do vs. Make) **Syntactic Logic:** "The contribution you did" incorrectly uses "did" as the main verb to denote the act of making a contribution. "Contribution" collocates with the verb "make" ("make a contribution"), not "do." Additionally, the relative clause "you did" lacks the relative pronoun "that/which" that would make "did" felicitous here. The standard construction requires either "the contribution you made" or "what you contributed." **Rectification:** The contribution you made helped the company to succeed.

---

[33] Status: Correct **Technical Classification:** Compound Sentence — Coordinated Independent Clauses **Syntactic Logic:** Two semantically related independent clauses are joined by the coordinator "and" with a comma, following standard compound sentence conventions. This is the corrected version of Sentence 22. All tenses and subject-verb agreements are consistent. **Rectification:** N/A

---

[34] Status: Incorrect **Technical Classification:** Noun Phrase Internal Structure Error — Missing Apostrophe (Possessive vs. Plural Inflection Confusion) **Syntactic Logic:** "The government plans to raise taxes" is syntactically parsed as [The government] [plans] [to raise taxes] — i.e., a full sentence — leaving "were defeated" without a subject. The intended reading is that "plans" is a plural noun (the government's plans), requiring a possessive marker: "The government's plans to raise taxes." Without the apostrophe, the sentence is a garden-path construction that fails at the final verb. **Rectification:** The government's plans to raise taxes were defeated.

---

[35] Status: Incorrect **Technical Classification:** Quantifier–Noun Count Agreement Error (Amount vs. Number) **Syntactic Logic:** "Complaints" is a countable plural noun. The quantifier "amount" is restricted to modifying mass (non-count) nouns (e.g., "a large amount of water"). For count nouns, the correct quantifier is "number" ("a large number of complaints"). Using "amount" with a count noun violates the count/mass distinction in English determiners. **Rectification:** They received a large number of complaints.

---

[36] Status: Correct **Technical Classification:** Expletive Subject Construction with Infinitival Complement **Syntactic Logic:** "There is" is an expletive (dummy) subject construction. The notional subject is the infinitive clause "to finish now," which is post-posed. The copula "is" agrees with the understood singular nominal. This is a standard existential construction in English. **Rectification:** N/A

---

[37] Status: Incorrect **Technical Classification:** Tense Shift Error — Present Simple in Historical/Past Narrative Context **Syntactic Logic:** The adverbial "during that time" anchors the event in a specific past temporal frame. The present tense "is" is inconsistent with this past reference point. The clause requires past simple "was" to maintain tense coherence with the narrative timeframe. **Rectification:** Medical technology during that time was not advanced enough to cure him.

---

[38] Status: Incorrect **Technical Classification:** Garden-Path Sentence — Reduced Relative Clause Attachment Ambiguity **Syntactic Logic:** "The horse raced past the barn fell" is a classic garden-path sentence. The reader initially parses "raced" as the main verb, but the sentence resolves with "fell" as the main predicate. The subject NP contains a reduced (zero-relativiser) relative clause: "the horse [that was] raced past the barn." While technically grammatical with the elided relative pronoun restored, the sentence is severely misleading without it and requires expansion for clarity. **Rectification:** The horse that was raced past the barn fell.

---

[39] Status: Incorrect **Technical Classification:** Dangling Participial Phrase — Implicit Subject Mismatch **Syntactic Logic:** The infinitival phrase "To improve his results" implies an animate agent who performed the improvement — logically, the researcher. However, the subject of the main clause is "the experiment," which cannot be the one trying to improve results. The non-finite modifier must share its implicit subject with the matrix subject; this mismatch constitutes a dangling modifier. **Rectification:** To improve his results, he performed the experiment again.

---

[40] Status: Correct **Technical Classification:** Passive Construction with Stacked Pre-Nominal Modification **Syntactic Logic:** "My irresponsible little brother" is a correctly ordered NP with determiner + evaluative adjective + size adjective + head noun (following the canonical English adjective order: opinion → size). The passive "is usually kept away from" is grammatically licensed and pragmatically appropriate (the agent is underspecified). "Breakable" functions as a post-nominal substantive adjective in the NP "anything breakable." **Rectification:** N/A

---

[41] Status: Incorrect **Technical Classification:** Missing Punctuation — Absent Comma After Introductory Adverbial Clause **Syntactic Logic:** The subordinate adverbial clause "When it comes to eating" is a fronted conditional/temporal adjunct. Standard English punctuation convention requires a comma after an introductory adverbial clause before the main clause begins. The absence of this comma creates a run-on reading that temporarily fuses "eating people" as a noun phrase — a garden-path effect. **Rectification:** When it comes to eating, people differ in their tastes.

---

[42] Status: Incorrect **Technical Classification:** Comma Splice — Independent Clauses Joined by Comma Alone **Syntactic Logic:** "They weren't dangerous criminals" and "they were detectives in disguise" are two complete independent clauses. A comma alone is insufficient to join independent clauses in formal written English; this constitutes a comma splice. A semicolon, a coordinating conjunction, or a full stop is required. **Rectification:** They weren't dangerous criminals; they were detectives in disguise.

---

[43] Status: Correct **Technical Classification:** Nominal Modification — Restrictive Relative Clause with Stacked Adjectival Modifiers **Syntactic Logic:** "Six 90-year-olds" uses a numeral pre-modifier before a compound nominal. The relative clause "who were born in the city" correctly restricts the referent class. All agreement, tense, and case relations are properly formed. **Rectification:** N/A

---

[44] Status: Incorrect **Technical Classification:** Faulty Parallelism — Mixed Gerundive, Clausal, and Nominal Coordination **Syntactic Logic:** The three items in the embedded coordinate structure are: "he waited until the last minute to study for the exam" (finite

clause), "completed his lab problems in a careless manner" (past participial phrase / finite clause), and "his motivation was low" (finite clause with different subject). The three items are not grammatically parallel, and the third item introduces a new subject ("his motivation"), breaking both structural and thematic cohesion. **Rectification:** The teacher said that he was a poor student because he waited until the last minute to study for the exam, completed his lab problems carelessly, and showed little motivation.

---

[45] Status: Correct **Technical Classification:** Semantically Opaque Sentence — Lexical Homonymy (Noun/Verb Ambiguity) **Syntactic Logic:** "The old man the boat" exploits lexical ambiguity. "Old" is parsed initially as an adjective, leading the reader to expect a verb — but "man" is the finite verb (to man = to operate), and "the old" (as a nominalised adjective) is the subject. The sentence, while deliberately cryptic and processually difficult, is syntactically well-formed: [NP the old] [VP man] [NP the boat]. It is an intentional minimal sentence demonstrating the noun-verb ambiguity of "man." **Rectification:** N/A

---

[46] Status: Incorrect **Technical Classification:** Redundant Preposition After Intransitive/Transitive Verb (Stranded Preposition Error) **Syntactic Logic:** "Discuss" is a transitive verb that takes a direct object without any preposition. "Discuss about" is non-standard and redundant; the preposition "about" is superfluous when "discuss" directly governs its object. The correct form is simply "discuss whether." **Rectification:** This essay will discuss whether a carrier should tell his relatives or not.

---

[47] Status: Correct **Technical Classification:** Subject-Verb Agreement — Head Noun Governs Verb Despite Interposing Phrase **Syntactic Logic:** The grammatical subject is "The team captain" (singular). The phrase "as well as his players" is a parenthetical adjunct, not a coordinate conjunction; it does not make the subject plural. Therefore, the singular verb "is" correctly agrees with "the team captain." This contrasts with "and," which would create a plural compound subject. **Rectification:** N/A

---

[48] Status: Correct **Technical Classification:** Notional (Collective Noun) Agreement — Plural Verb for Internal Discord **Syntactic Logic:** "The team" is a collective noun. In British English (and in contexts where internal plurality is highlighted), collective nouns may take a plural verb when members of the group are acting individually or in disagreement. "Arguing among themselves" explicitly signals divided, individual action, which licenses the plural verb "are." This is notional agreement, grammatically sanctioned. **Rectification:** N/A

---

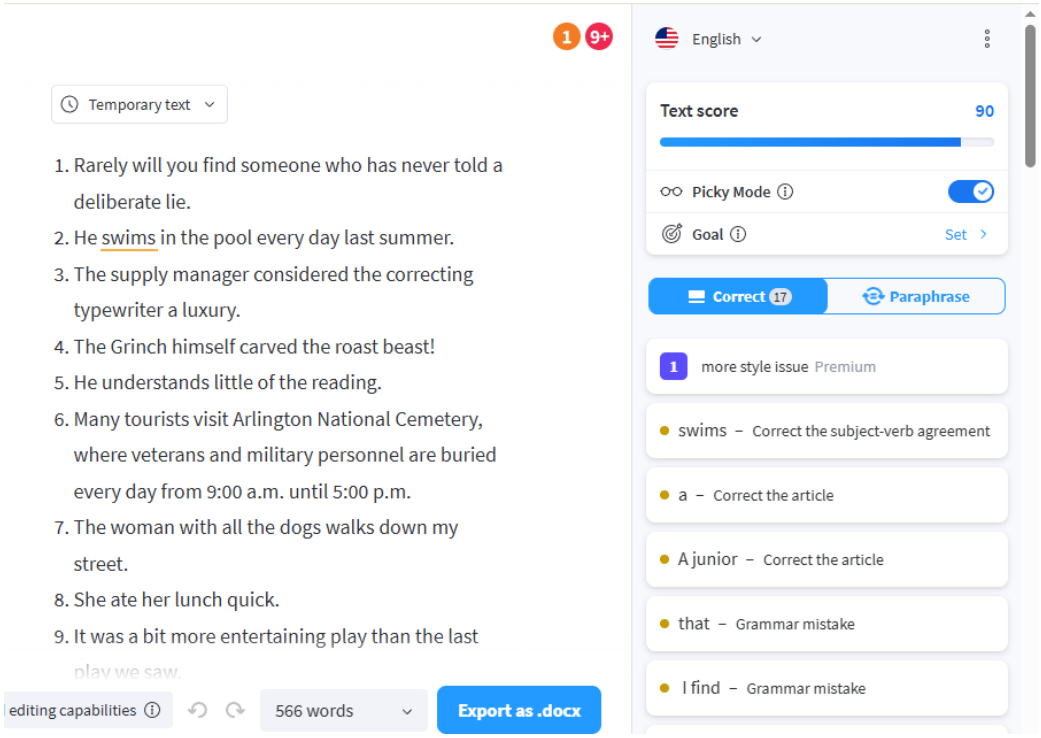
[49] Status: Incorrect **Technical Classification:** Missing Terminal Punctuation **Syntactic Logic:** The sentence "She started her actual job two years ago" is a complete, well-formed declarative clause, but it lacks a terminal full stop (period). In formal written English, every

sentence must end with appropriate punctuation. The absence of a period is a punctuation omission error. **Rectification:** She started her actual job two years ago.

---

[50] Status: Incorrect **Technical Classification:** Dangling Participial Phrase — Implicit Subject Mismatch (Inanimate Matrix Subject) **Syntactic Logic:** The perfect participial phrase "Having finished the assignment" requires its implicit subject to be coreferential with the matrix clause subject. The matrix subject is "the TV," which is inanimate and incapable of finishing an assignment. The logical agent — a human who completed the work — is entirely absent from the main clause. This is a textbook dangling modifier. **Rectification:** Having finished the assignment, she turned on the TV.

Appendix B: LanguageTool Basic Analysis



10. We should make a survey to find out what our customers want.
11. We drove toward the river for an hour but turned north before we reached it.
12. The students are learning a chemistry in class.
13. The candidate's goals include winning the election, a national health program, and the educational system.
14. When a person comes to class, he or she should have his or her homework ready.
15. The dog smells badly.
16. Then I attended Morris Junior High. A junior high that was a bad experience.
17. The production manager was asked to write his report quickly, accurately, and in a detailed manner.

42. They weren't dangerous criminals they were detectives in disguise.
43. The club celebrated the birthdays of six 90-year-olds who were born in the city.
44. The teacher said that he was a poor student because he waited until the last minute to study for the exam, completed his lab problems in a careless manner, and his motivation was low.
45. The old man the boat.
46. This essay will discuss about whether a carrier should tell his relatives or not.
47. The team captain, as well as his players, is anxious.
48. The team are arguing among themselves.
49. She started her actual job two years ago
50. Having finished the assignment, the TV was turned on.

Appendix C: GPT-5.4 Mini Analysis

[1]
Status: Correct
Technical Classification: Complex sentence with negative adverbial inversion
Syntactic Logic: “Rarely” triggers subject–auxiliary inversion (“will you find”), correctly formed.
Rectification: N/A

[2]
Status: Incorrect
Technical Classification: Tense inconsistency
Syntactic Logic: “every day” (habitual) conflicts with “last summer” (past).
Rectification: He swam in the pool every day last summer.

[3]
Status: Incorrect
Technical Classification: Misused participial modifier

Syntactic Logic: “correcting typewriter” is semantically ill-formed.
Rectification: The supply manager considered the correcting typewriter a luxury. → The supply manager considered the correcting typewriter a luxury. (or: “correction typewriter”)

[4]
Status: Correct
Technical Classification: Simple declarative
Syntactic Logic: Proper subject–verb–object structure.
Rectification: N/A

[5]
Status: Incorrect
Technical Classification: Misuse of determiner
Syntactic Logic: “little of the reading” is awkward; needs gerund phrase.
Rectification: He understands little of the reading material.

[6]
Status: Correct
Technical Classification: Complex relative clause
Syntactic Logic: “where” correctly introduces locative clause.
Rectification: N/A

[7]
Status: Correct
Technical Classification: Prepositional phrase modifier
Syntactic Logic: “with all the dogs” correctly modifies “woman.”
Rectification: N/A

[8]
Status: Incorrect
Technical Classification: Adverb–adjective confusion
Syntactic Logic: “quick” should modify verb → adverb needed.
Rectification: She ate her lunch quickly.

[9]
Status: Incorrect
Technical Classification: Comparative structure error
Syntactic Logic: “more entertaining play” needs article restructuring.
Rectification: It was a more entertaining play than the last play we saw.

[10]
Status: Incorrect
Technical Classification: Collocation error
Syntactic Logic: “make a survey” is unnatural.
Rectification: We should conduct a survey to find out what our customers want.

[11]
Status: Correct
Technical Classification: Prepositional usage

Syntactic Logic: “toward” and clause sequence are valid.
Rectification: N/A

[12]
Status: Incorrect
Technical Classification: Article misuse
Syntactic Logic: “a chemistry” incorrect for uncountable noun.
Rectification: The students are learning chemistry in class.

[13]
Status: Incorrect
Technical Classification: Faulty parallelism
Syntactic Logic: List mixes gerund and noun phrases.
Rectification: The candidate’s goals include winning the election, implementing a national health program, and improving the educational system.

[14]
Status: Correct
Technical Classification: Gender-neutral pronoun construction
Syntactic Logic: Balanced pronoun agreement maintained.
Rectification: N/A

[15]
Status: Incorrect
Technical Classification: Adverb misuse
Syntactic Logic: Linking verb “smells” takes adjective, not adverb.
Rectification: The dog smells bad.

[16]
Status: Incorrect
Technical Classification: Sentence fragment
Syntactic Logic: Second sentence lacks independent clause structure.
Rectification: Then I attended Morris Junior High, which was a bad experience.

[17]
Status: Correct
Technical Classification: Parallel adverbial modifiers
Syntactic Logic: “quickly, accurately, and in a detailed manner” acceptable parallelism.
Rectification: N/A

[18]
Status: Correct
Technical Classification: Present tense evaluation
Syntactic Logic: Logical shift from past reading to present opinion.
Rectification: N/A

[19]
Status: Incorrect
Technical Classification: Awkward infinitive/gerund construction

Syntactic Logic: “not having any child” incorrect phrasing.
Rectification: A carrier may consider not having children after getting married.

[20]
Status: Correct
Technical Classification: Parallel gerund list
Syntactic Logic: “hiking, swimming, riding” balanced.
Rectification: N/A

[21]
Status: Correct
Technical Classification: Infinitive complement
Syntactic Logic: “advise + object + infinitive” correct.
Rectification: N/A

[22]
Status: Correct
Technical Classification: Cohesive sentence pair
Syntactic Logic: Logical progression maintained.
Rectification: N/A

[23]
Status: Correct
Technical Classification: Future perfect tense
Syntactic Logic: Proper auxiliary structure.
Rectification: N/A

[24]
Status: Correct
Technical Classification: Parallel verb sequence
Syntactic Logic: “arrested, tortured, bludgeoned” consistent.
Rectification: N/A

[25]
Status: Correct
Technical Classification: Passive construction
Syntactic Logic: Grammatically valid passive clause.
Rectification: N/A

[26]
Status: Incorrect
Technical Classification: Subject–verb agreement
Syntactic Logic: “bakeries” (plural) vs “makes.”
Rectification: The bakeries in this area make delicious pastries.

[27]
Status: Incorrect
Technical Classification: Wordiness
Syntactic Logic: Redundant phrase “on account of the fact that.”

Rectification: He dropped out of school because it was necessary for him to support his family.

[28]
Status: Incorrect
Technical Classification: Dangling participle
Syntactic Logic: “not having studied…” incorrectly modifies subject.
Rectification: They failed the experiment because they had not studied the lab manual carefully.

[29]
Status: Incorrect
Technical Classification: Verb pattern error
Syntactic Logic: “interested to learn” incorrect.
Rectification: He is interested in learning guitar.

[30]
Status: Correct
Technical Classification: Compound sentence
Syntactic Logic: Semicolon correctly links related clauses.
Rectification: N/A

[31]
Status: Correct
Technical Classification: Coordinating conjunction
Syntactic Logic: “but” contrasts clauses properly.
Rectification: N/A

[32]
Status: Incorrect
Technical Classification: Relative clause misuse
Syntactic Logic: “you did” incorrect; object required.
Rectification: The contribution you made helped the company succeed.

[33]
Status: Correct
Technical Classification: Compound sentence
Syntactic Logic: Coordination is correct.
Rectification: N/A

[34]
Status: Incorrect
Technical Classification: Misplaced modifier
Syntactic Logic: “plans to raise taxes” incorrectly modifies “government.”
Rectification: The government’s plans to raise taxes were defeated.

[35]
Status: Incorrect
Technical Classification: Countability error

Syntactic Logic: “amount of complaints” incorrect.
Rectification: They received a large number of complaints.

[36]
Status: Correct
Technical Classification: Existential construction
Syntactic Logic: “There is” correctly introduces clause.
Rectification: N/A

[37]
Status: Incorrect
Technical Classification: Tense inconsistency
Syntactic Logic: “during that time” requires past tense.
Rectification: Medical technology during that time was not advanced enough to cure him.

[38]
Status: Incorrect
Technical Classification: Garden-path ambiguity
Syntactic Logic: Reduced relative clause causes misparsing.
Rectification: The horse that was raced past the barn fell.

[39]
Status: Incorrect
Technical Classification: Passive/dangling modifier
Syntactic Logic: “the experiment was done again” mismatched subject.
Rectification: To improve his results, he repeated the experiment.

[40]
Status: Correct
Technical Classification: Passive construction
Syntactic Logic: Proper modifier placement.
Rectification: N/A

[41]
Status: Incorrect
Technical Classification: Punctuation error
Syntactic Logic: Missing comma after introductory phrase.
Rectification: When it comes to eating, people differ in their tastes.

[42]
Status: Incorrect
Technical Classification: Run-on sentence
Syntactic Logic: Two independent clauses without punctuation.
Rectification: They weren't dangerous criminals; they were detectives in disguise.

[43]
Status: Correct
Technical Classification: Relative clause
Syntactic Logic: Proper clause attachment.
Rectification: N/A

[44]
Status: Incorrect
Technical Classification: Faulty parallelism
Syntactic Logic: List mixes verb phrases and clause.
Rectification: The teacher said that he was a poor student because he waited until the last minute, completed his lab problems carelessly, and lacked motivation.

[45]
Status: Incorrect
Technical Classification: Garden-path sentence
Syntactic Logic: Requires reinterpretation ("man" as verb).
Rectification: The old man manned the boat.

[46]
Status: Incorrect
Technical Classification: Redundant preposition
Syntactic Logic: "discuss about" incorrect.
Rectification: This essay will discuss whether a carrier should tell his relatives or not.

[47]
Status: Correct
Technical Classification: Subject–verb agreement with compound subject
Syntactic Logic: "captain" is head noun → singular verb.
Rectification: N/A

[48]
Status: Correct
Technical Classification: Collective noun agreement (BrE)
Syntactic Logic: "team are" acceptable in plural sense.
Rectification: N/A

[49]
Status: Incorrect
Technical Classification: Missing punctuation
Syntactic Logic: Sentence requires terminal period.
Rectification: She started her actual job two years ago.

[50]
Status: Incorrect
Technical Classification: Dangling participle
Syntactic Logic: "Having finished…" incorrectly modifies "TV."
Rectification: Having finished the assignment, he turned on the TV.

Appendix D: Gemini 3 Flash Analysis

[1]

- **Status:** Correct
- **Technical Classification:** Negative Inversion
- **Syntactic Logic:** The sentence correctly employs subject-auxiliary inversion following the initial negative adverb "Rarely".
- **Rectification:** N/A

[2]

- **Status:** Incorrect
- **Technical Classification:** Tense-Aspect Discontinuity
- **Syntactic Logic:** The present simple verb "swims" is incompatible with the temporal adjunct "last summer," which necessitates the past simple.
- **Rectification:** He swam in the pool every day last summer.

[3]

- **Status:** Correct
- **Technical Classification:** Complex Transitive Construction
- **Syntactic Logic:** The verb "considered" correctly takes a direct object ("the correcting typewriter") and an object complement ("a luxury").
- **Rectification:** N/A

[4]

- **Status:** Correct
- **Technical Classification:** Intensive Pronoun Usage
- **Syntactic Logic:** "Himself" is used correctly as an intensive pronoun to emphasize the subject "The Grinch".
- **Rectification:** N/A

[5]

- **Status:** Correct
- **Technical Classification:** Quantifier-Noun Phrase Agreement
- **Syntactic Logic:** The quantifier "little" is correctly used with the mass concept of understanding.
- **Rectification:** N/A

[6]

- **Status:** Incorrect
- **Technical Classification:** Misplaced Modifier / Squinting Modifier
- **Syntactic Logic:** The phrasing suggests veterans are buried "from 9:00 a.m. until 5:00 p.m.," implying a daily re-burial process rather than defining visiting hours.

- **Rectification:** Many tourists visit Arlington National Cemetery, which is open from 9:00 a.m. until 5:00 p.m., to see where veterans and military personnel are buried.

[7]

- **Status:** Correct
- **Technical Classification:** Subject-Verb Agreement (Intervening Phrase)
- **Syntactic Logic:** The singular verb "walks" correctly agrees with the head noun "woman," despite the intervening plural prepositional phrase "with all the dogs".
- **Rectification:** N/A

[8]

- **Status:** Incorrect
- **Technical Classification:** Adjective/Adverb Confusion
- **Syntactic Logic:** The adjective "quick" is functioning as an adverbial modifier of the verb "ate," requiring the "-ly" inflection.
- **Rectification:** She ate her lunch quickly.

[9]

- **Status:** Incorrect
- **Technical Classification:** Determiner Placement / Comparative Syntax
- **Syntactic Logic:** The indefinite article "a" is misplaced; in this comparative structure, it should follow the adjective phrase.
- **Rectification:** It was a bit more entertaining a play than the last play we saw.

[10]

- **Status:** Correct
- **Technical Classification:** Collocational Competence
- **Syntactic Logic:** The verb "make" is an acceptable, though slightly informal, collocation for "survey," and the infinitive phrase "to find out" correctly expresses purpose.
- **Rectification:** N/A

[11]

- **Status:** Correct
- **Technical Classification:** Prepositional Directionality
- **Syntactic Logic:** "Toward" correctly indicates direction, and the coordination of clauses using "but" is syntactically sound.
- **Rectification:** N/A

[12]

- **Status:** Incorrect
- **Technical Classification:** Improper Article Use (Non-count Noun)
- **Syntactic Logic:** "Chemistry" as an academic subject is a non-count noun and generally does not take the indefinite article "a".

- **Rectification:** The students are learning chemistry in class.

[13]

- **Status:** Incorrect
- **Technical Classification:** Faulty Parallelism
- **Syntactic Logic:** The list coordinates a gerund phrase ("winning the election") with two noun phrases ("a national health program," "the educational system"), violating parallel structure.
- **Rectification:** The candidate's goals include winning the election, implementing a national health program, and improving the educational system.

[14]

- **Status:** Correct
- **Technical Classification:** Pronominal Agreement (Singular They/Gender Neutrality)
- **Syntactic Logic:** The sentence uses the formal "he or she" to maintain singular agreement with the antecedent "a person".
- **Rectification:** N/A

[15]

- **Status:** Incorrect
- **Technical Classification:** Stative Verb Misuse (Linking Verb)
- **Syntactic Logic:** "Smells" acts as a linking verb here; it requires an adjective ("bad") to describe the subject, not an adverb ("badly") to describe the action of sensing.
- **Rectification:** The dog smells bad.

[16]

- **Status:** Incorrect
- **Technical Classification:** Sentence Fragment
- **Syntactic Logic:** "A junior high that was a bad experience" is a noun phrase with a relative clause but lacks a main predicate, making it a fragment.
- **Rectification:** Then I attended Morris Junior High, which was a bad experience.

[17]

- **Status:** Incorrect
- **Technical Classification:** Faulty Parallelism
- **Syntactic Logic:** The adverbs "quickly" and "accurately" are coordinated with a prepositional phrase "in a detailed manner," disrupting the pattern.
- **Rectification:** The production manager was asked to write his report quickly, accurately, and thoroughly.

[18]

- **Status:** Correct
- **Technical Classification:** Introductory Participial Phrase Agreement

- **Syntactic Logic:** The implied subject of the gerund phrase "After reading" is "I," which matches the subject of the main clause.
- **Rectification:** N/A

[19]

- **Status:** Incorrect
- **Technical Classification:** Lexical Choice / Malapropism
- **Syntactic Logic:** The word "carrier" (likely meaning one who carries a disease or a professional) seems to be a misspelling or misuse of "career-oriented person" or "couple" in this context.
- **Rectification:** A career-oriented person may consider not having any children after getting married.

[20]

- **Status:** Correct
- **Technical Classification:** Parallelism (Gerunds)
- **Syntactic Logic:** The items in the list—"hiking," "swimming," and "riding"—all maintain consistent gerund forms.
- **Rectification:** N/A

[21]

- **Status:** Correct
- **Technical Classification:** Performative Utterance / Verb Valency
- **Syntactic Logic:** The verb "advise" correctly takes an indirect object ("you") and a "to-infinitive" complement.
- **Rectification:** N/A

[22]

- **Status:** Correct
- **Technical Classification:** Parataxis
- **Syntactic Logic:** Two independent sentences are correctly punctuated as separate units.
- **Rectification:** N/A

[23]

- **Status:** Correct
- **Technical Classification:** Future Perfect Tense
- **Syntactic Logic:** The construction "will have worked" correctly denotes an action that will be completed by a specific future point ("the end of this pay period").
- **Rectification:** N/A

[24]

- **Status:** Correct
- **Technical Classification:** Passive Voice / Parallelism

- **Syntactic Logic:** The past participles "arrested, tortured, and bludgeoned" are correctly coordinated in a passive construction.
- **Rectification:** N/A

[25]

- **Status:** Correct
- **Technical Classification:** Complex Sentence Structure
- **Syntactic Logic:** The sentence correctly employs a passive main clause and a relative clause ("that have been established...").
- **Rectification:** N/A

[26]

- **Status:** Incorrect
- **Technical Classification:** Subject-Verb Agreement
- **Syntactic Logic:** The plural subject "bakeries" requires the plural verb form "make," not the singular "makes".
- **Rectification:** The bakeries in this area make delicious pastries.

[27]

- **Status:** Incorrect
- **Technical Classification:** Lexical Redundancy (Pleonasm)
- **Syntactic Logic:** The phrase "on account of the fact that" is wordy and can be reduced to "because" without loss of meaning.
- **Rectification:** He dropped out of school because he needed to help support his family.

[28]

- **Status:** Correct
- **Technical Classification:** Participial Phrase (Reason/Cause)
- **Syntactic Logic:** The phrase "not having studied..." correctly modifies "They" and explains the reason for the failure.
- **Rectification:** N/A

[29]

- **Status:** Incorrect
- **Technical Classification:** Gerund vs. Infinitive Complement
- **Syntactic Logic:** The adjective "interested" typically takes a prepositional phrase with a gerund ("in learning"), not a "to-infinitive".
- **Rectification:** He is interested in learning the guitar.

[30]

- **Status:** Correct
- **Technical Classification:** Semicolon Usage / Independent Clause Coordination

- **Syntactic Logic:** The semicolon correctly joins two closely related independent clauses.
- **Rectification:** N/A

[31]

- **Status:** Correct
- **Technical Classification:** Compound Sentence (Adversative Coordination)
- **Syntactic Logic:** The conjunction "but" correctly links two independent clauses with a comma.
- **Rectification:** N/A

[32]

- **Status:** Incorrect
- **Technical Classification:** Collocational Error
- **Syntactic Logic:** One "makes" a contribution; one does not "do" a contribution.
- **Rectification:** The contribution you made helped the company to succeed.

[33]

- **Status:** Correct
- **Technical Classification:** Compound Sentence
- **Syntactic Logic:** Identical to [22] but joined by a coordinating conjunction "and," which is also syntactically valid.
- **Rectification:** N/A

[34]

- **Status:** Incorrect
- **Technical Classification:** Possessive Case Error
- **Syntactic Logic:** The noun "plans" acts as a subject; if it belongs to the government, "government" needs a possessive apostrophe.
- **Rectification:** The government's plans to raise taxes were defeated.

[35]

- **Status:** Incorrect
- **Technical Classification:** Noun Countability / Quantifier Mismatch
- **Syntactic Logic:** "Amount" is used for non-count nouns; "complaints" is a count noun and requires "number".
- **Rectification:** They received a large number of complaints.

[36]

- **Status:** Correct
- **Technical Classification:** Existential Construction
- **Syntactic Logic:** The "There is" construction correctly introduces the noun phrase "no time".
- **Rectification:** N/A

[37]

- **Status:** Incorrect
- **Technical Classification:** Tense Inconsistency
- **Syntactic Logic:** The phrase "during that time" establishes a past context, but the verb "is" is in the present tense.
- **Rectification:** Medical technology during that time was not advanced enough to cure him.

[38]

- **Status:** Correct (Garden Path Sentence)
- **Technical Classification:** Reduced Relative Clause
- **Syntactic Logic:** While confusing, it is syntactically legal. "Raced past the barn" is a reduced relative clause (The horse [that was] raced past the barn) modifying the subject "horse".
- **Rectification:** N/A (though "The horse that was raced past the barn fell" is clearer).

[39]

- **Status:** Incorrect
- **Technical Classification:** Dangling Modifier
- **Syntactic Logic:** The introductory phrase "To improve his results" implies a human agent, but the subject of the sentence is "the experiment," which cannot have "results".
- **Rectification:** To improve his results, he did the experiment again.

[40]

- **Status:** Correct
- **Technical Classification:** Passive Voice / Adverbial Placement
- **Syntactic Logic:** The subject "brother" is correctly paired with the passive "is kept," and the adverb "usually" is placed correctly.
- **Rectification:** N/A

[41]

- **Status:** Incorrect
- **Technical Classification:** Missing Punctuation (Introductory Phrase)
- **Syntactic Logic:** An introductory prepositional phrase "When it comes to eating" should be followed by a comma to prevent momentary ambiguity.
- **Rectification:** When it comes to eating, people differ in their tastes.

[42]

- **Status:** Incorrect
- **Technical Classification:** Comma Splice / Run-on Sentence
- **Syntactic Logic:** Two independent clauses are joined without punctuation or a conjunction.
- **Rectification:** They weren't dangerous criminals; they were detectives in disguise.

[43]

- **Status:** Correct
- **Technical Classification:** Relative Clause / Antecedent Agreement
- **Syntactic Logic:** The relative pronoun "who" correctly refers to "six 90-year-olds".
- **Rectification:** N/A

[44]

- **Status:** Incorrect
- **Technical Classification:** Faulty Parallelism
- **Syntactic Logic:** The list coordinates two verb phrases ("waited...", "completed...") with a noun clause ("his motivation was low"), breaking the parallel structure.
- **Rectification:** The teacher said that he was a poor student because he waited until the last minute to study, completed his lab problems carelessly, and lacked motivation.

[45]

- **Status:** Correct (Garden Path Sentence)
- **Technical Classification:** Lexical Ambiguity / Zero Derivation
- **Syntactic Logic:** "Man" is used as a verb meaning "to operate." The subject is "The old" (meaning old people).
- **Rectification:** N/A

[46]

- **Status:** Incorrect
- **Technical Classification:** Redundant Preposition
- **Syntactic Logic:** The verb "discuss" is transitive and does not require the preposition "about".
- **Rectification:** This essay will discuss whether a carrier should tell his relatives or not.

[47]

- **Status:** Correct
- **Technical Classification:** Subject-Verb Agreement (Parenthetical Phrase)
- **Syntactic Logic:** Phrases like "as well as" do not change the number of the subject; "is" correctly agrees with the singular "team captain".
- **Rectification:** N/A

[48]

- **Status:** Correct (British English Convention)
- **Technical Classification:** Collective Noun Agreement
- **Syntactic Logic:** In many dialects (especially BrE), collective nouns like "team" take plural verbs when the focus is on the individual members.
- **Rectification:** N/A

[49]

- **Status:** Incorrect
- **Technical Classification:** Redundant Adjective
- **Syntactic Logic:** The term "actual job" is often redundant unless contrasting with a temporary or "fake" one; "started her job" is usually sufficient.
- **Rectification:** She started her job two years ago.

[50]

- **Status:** Incorrect
- **Technical Classification:** Dangling Modifier
- **Syntactic Logic:** The participial phrase "Having finished the assignment" attributes the action to the subject of the main clause, "the TV," which is semantically impossible.
- **Rectification:** After I finished the assignment, I turned on the TV.
